## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The patent term adjustment to date is 360 days. If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the term adjustment will be 360 days.

If a continued prosecution application (CPA) was filed in the above-identified application, the filing date that determines patent term adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system. (<http://pair.uspto.gov>)

Any questions regarding the patent term extension or adjustment determination should be directed to the Office of Patent Legal Administration at (703)305-1383.

## Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

### **DETAILED ACTION**

Receipt is acknowledged of the amendment, filed on 7/15/2003, which has been entered in the file. Claims 1-11 and 13-28 are pending. Claims 8-11 and 14-28 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

#### ***Examiner's amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in the amendment filed on 7/15/2003 (see page 7, lines 8-10). The examiner's amendment was required in order to place the application in condition for allowance.

The application has been amended as follows:

#### **In the claims:**

Claims 8-11 and 14-28 have been cancelled.

#### ***Allowable Subject Matter***

2. Claims 1-7 and 13 have been allowed over the prior art of record.
3. The following is an examiner's statement of reasons for allowance: The prior art of record, taken alone or in combination, fails to teach or fairly suggest: an integrated circuit card (IC) having a plurality of connector terminals, wherein the connector terminals are laid out in first and second sequences staggered relatively in a sequence

Art Unit: 2876

direction and adjacent to one another forward and backward as viewed in an IC card inserting direction, and wherein the first sequence includes a source voltage supply terminal, and the second sequence is devoid of connector terminals at a position adjacent to the source voltage supply terminal and at positions adjacent to terminal-to-terminal areas at opposite sides of the source voltage supply terminal; in combination with the other claimed limitations as set forth in the claims.

The prior art of record (for example: Hamada US 4,794,243, Hamada US 4,780,603, and Lee et al US 6,483,038 B2, all previously cited) teaches an integrated circuit card (IC) having a plurality of connector terminals, wherein the connector terminals are laid out in first and second sequences staggered relatively in a sequence direction and adjacent to one another forward and backward as viewed in an IC card inserting direction. However, none of these references specifically teach the first sequence including a source voltage supply terminal, and the second sequence being devoid of connector terminals at a position adjacent to the source voltage supply terminal and at positions adjacent to terminal-to-terminal areas at opposite sides of the source voltage supply terminal.

Okayama et al (US 6,157,316, previously cited) teaches an integrated circuit card (110) having connector terminals; wherein a first connector terminal sequence (shown in figure 2A) has a connector (pin 17) for the supply of a source voltage (see figures 1, 2A, 2B, column 3 lines 19-30). However, Okayama et al also fails to specifically teach a second sequence being devoid of connector terminals at a position adjacent to the

Art Unit: 2876

source voltage supply terminal and at positions adjacent to terminal-to-terminal areas at opposite sides of the source voltage supply terminal.

Thus, with no teaching from the prior art, and without the benefit of applicant's teachings, there is no motivation for one of ordinary skill in the art to combine/modify the prior art of record in a manner so as to create the claimed invention.

Nishizawa et al (US 2003/0112613 A1) and Nishizawa et al (US 2003/0112611 A1) (both having some common inventors and a common assignee with the instant invention) teach an integrated circuit card (MFC) having a plurality of connector terminals, wherein the connector terminals are laid out in first and second sequences (the first sequence including terminals 1-7, and the second sequence including terminals 8-13) staggered relatively in a sequence direction and adjacent to one another forward and backward as viewed in an IC card inserting direction, and wherein the first sequence includes a source voltage supply terminal (terminal number 4), and the second sequence is devoid of connector terminals at a position adjacent to the source voltage supply terminal and at positions adjacent to terminal-to-terminal areas at opposite sides of the source voltage supply terminal (see figures 1 and 2). Both publications only claim that the second column is provided so as to have a terminal-to-terminal area at a position adjacent to the source voltage supply connector terminal (see claim 13), and do not claim the second sequence being devoid of connector terminals at a position adjacent to the source voltage supply terminal and at positions adjacent to terminal-to-terminal areas at opposite sides of the source voltage supply terminal. Thus, there is no double patenting rejection.

Art Unit: 2876

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nishizawa et al (US 2003/0112613 A1) and Nishizawa et al (US 2003/0112611 A1) (the pertinence of these references has been discussed above).
